

# MBNL MyLocken App Simulator User Guide

2020

# Locken MNBL Simulators

- Simulators are replicas of the Locken Smart Access (LSA) and MBNL MyLocken App that facilitates the execution of practical exercises on a safe environment. Simulators can facilitate the execution of the practical exercises as expected, avoiding the common issues via normal classroom-based training
  - Within this document you will find step by step guide as to how to launch and actively step through your activities on which ultimately will be conducted on the live platform.
  - Application is an Administration Portal and does not require access to internet to walk through the activities you wish to perform.
  - The model created can be operated in a Windows System.

# MBNL MyLocken App – Main screen

The screenshot shows the main screen of the MBNL MyLocken App. At the top, the status bar displays the time 11:29, signal strength, 4G LTE, and 38% battery. Below the status bar is a browser address bar with the URL <https://is.lockensmartacce...>. The main content area features a black background with a white key icon and the text "LOCKEN Smart Access". Below this is a red and white circular logo. The login form consists of an "Email" input field, a "Password" input field with a toggle icon, and a checked checkbox for "Remember me on this computer". Below the form are two informational boxes: one stating "After a successful sign in, we use a cookie in your browser to track your session. You can refer our [Cookie Policy](#) for more details." and another stating "By signing in, you agree to our [Privacy Policy](#)". At the bottom of the form is a large red "SIGN IN" button and a "Forgot Password" link. The Android navigation bar is visible at the very bottom.

- For Login, Use the same information entered during the registration step
- Use dummy information to complete the validation process
